COMPUTING PROJECTS IN VISUAL BASIC.NET

To get **Computing Projects in Visual Basic.NET** eBook, you should refer to the link below and download the file or have access to additional information which are related to COMPUTING PROJECTS IN VISUAL BASIC.NET book.

Pearson Education Limited, United Kingdom, 2003. Paperback. Book Condition: New. 276 x 216 mm. Language: English . Brand New Book. Computing Projects In Visual Basic. NET is ideal for AS/A level Computing, A level ICT and Advanced VCE ICT students. The text assumes no starting knowledge of programming and covers everything needed to write a large program, which makes this a great text for Students on other courses, such as BTEC National, and first year HND and degree courses, as well as personal and professional readers. For AS/A level Computing - depending on the Examining Board computing students may need to produce a small project or write a number of programs for the AS part of the course. For A level a substantial piece of programming may be needed. The theory part of the course covers a number of important programming concepts, which are far better learned through practical programming than only through the pages of a textbook. Visual Basic is an excellent, modern language through which to learn these concepts. For AVCE students - an optional unit on programming using an event-driven language such as Visual Basic is offered by all the Boards. One of the Boards offers two units. Although the amount of programming is not expected to be as much as an A level student of Computing would do, it is still substantial. The object oriented approach to programming is explained and used where applicable.
