

A treatise on chemistry Volume 3, pt. 4

Filesize: 7.86 MB

Reviews

This pdf is very gripping and exciting. I could comprehend everything using this created e book. You won't really feel monotony at any moment of your own time (that's what catalogs are for about in the event you ask me).

(Miss Vergie Marks DDS)

A TREATISE ON CHEMISTRY VOLUME 3, PT. 4

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 200 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 edition. Excerpt: . . . than in cold, and forms fine, radiating crystals, resembling those of wavellite. Silver mctasulphobenzoate, $C_7H_4S_05Ag_2 H_{20}$, crystallizes in yellow prisms which readily dissolve. Normal ethyl mctasulphobenzoate, $CrH_4S_05(C. 2H_6)_2$, is prepared from the chloride of the acid and absolute alcohol, and forms a thick liquid which has a faint ethereal odour, and decomposes on heating. It is soluble in water, and its solution decomposes when heated into alcohol and the acid. 1 Ann. Chnn. Pharm. clxxviii. 275. Barth, *ibid*, cxlviii. 33. s Otto, *ibid*, exxii. 155. Acid ethyl mctasulphobenzoate or Ethyl metasulphobenzoic acid, $C_7H_5S_06. C_2H_6$. The ammonium salt of this acid, $C_7H_4S_05 (NH_4). C_2H_6$, is obtained by passing ammonia into an alcoholic solution of the normal ether or by the action of alcoholic ammonia on the chloride. It crystallizes in large, four-sided, transparent tablets. If the ammonia be precipitated with platinum chloride, and the excess of platinum removed by sulphuretted hydrogen, a solution of the free acid is obtained; its salts crystallize well and are readily soluble. Its constitution is probably represented by the former of the two following formulae: $SO_3H Xsoq. cjhj C, H_4 C_6H C_02. C_2H_5 C_02H$ Metasulphobenzoyl chloride, $C_7H_4S_03C_{12}$, is obtained by heating the dry acid with phosphorus pentachloride; the phosphorus oxychloride is then distilled off and the residue washed with water. It is a thick, oily liquid, which has a faint but unpleasant odour, and decomposes on distillation into sulphur dioxide and metachloroberizoyl chloride. The latter is also formed when the...
