

Borate fusion of physics and chemistry - dedicated to X-ray fluorescence spectroscopy workers

Filesize: 4 MB

Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

BORATE FUSION OF PHYSICS AND CHEMISTRY - DEDICATED TO X-RAY FLUORESCENCE SPECTROSCOPY WORKERS

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 108 Publisher: East China University of Technology Press Pub. Date :2006-11-1. Book of X-ray fluorescence spectroscopy quantitative analysis of the powder melt and choice. and choice of oxidant. the solubility of oxide in flux . the release agent in the sample distribution. the mechanism of release agent. volatile elements of the melt. and other refractory alloy melt samples from the physical and chemical issues are explored theoretically and with examples of the X-ray fluorescence spectrum in the sample melt conditions. This book is the first field of X-ray fluorescence spectroscopy to explore borate fusion of the physical and chemical behavior of the books. the first author. Dr. Claisse is also the founder of Melt sample preparation method. The book contains the author's nearly 50 years of borate melt film preparation of practical experience and theoretical exploration. Book readers are mainly workers in the majority of X-ray fluorescence spectroscopy. but also as a comprehensive university chemistry and related science and engineering colleges and professional students and teachers reference books. Contents: first borate melt in the physical and chemical problems in Chapter 1 a general description of borate molten 1.1 1.2 borate fusion melt a brief historical review 1.3 chip sample preparation than the other advantages of the contents of the book 1.4 Overview Chapter 2 for 2.1 boron oxide flux system Li_2O $2.2\text{B}_2\text{O}_3$ a lithium tetraborate flux 2.3 2.4 lithium borate flux composition is between 2.5 and LiM LiT flux between the composition of LiT-LiM 2.6 outside the flux of sodium tetraborate flux 2.8 2.7 Sodium flux bias 2.9 Partial lithium phosphate samples Chapter 3 flux and flux 3.1 3.2 sulfur oxides. sulfates and sulfur 3.3 carbonates. nitrates....
