In our diagram we show the 14 principal stars, as seen with an opera glass; also, the names of the entire family. Aicyone is 1 (eta) of Taurus. The position and the magnitudes of these stars are very difficult to be identified from the catalogues and maps published at different times, Fig. 90. -The 14 principal Pleiades. As our object is to describe the heavens as they are now, we have given the position, the names and the magnitude of the Pleiades for the year 1ss0; the amateurs who wish to go deeper with the study of this interesting group can refer to M. Flammarions book, Les Etoiles, pages 2s9 to 306. Messrs. Paul and Prosper Henry, after taking the photograph of the Pleiadesihc 16th of December, 1ss5, discovered a bright nebula starting from Mala, going a little west, then...
